SUBJECT: PRELIMINARY Report #4 -- 2005 Pacific Whiting Fishery

This report consolidates preliminary state, federal, and tribal data for the 2005 Pacific whiting fishery (whiting) off Washington, Oregon, and California. Due to concerns about the incidental catch of overfished species, bycatch limits are in place for canary (4.7 mt) and widow rockfish (200 mt) taken in the non-tribal sectors of the fishery. If either bycatch limit is reached, the primary whiting seasons for the non-tribal fisheries will end regardless of the amount of whiting allocation remaining.
